PROBLEM EXERCISE

- A river 'Rava' is situated in the state 'ABC'. Total 30 villages of 3 districts, X, Y, Z, are directly dependant on the river water of Rava for getting drinking water and irrigation. Since 2018 the people of these 30 villages have been facing the problem of polluted river water. The river water is not fit for the consumption for humans, for animals or for irrigation purpose. As per the report of the local research team of the Research Institute ERI of district X, the river pollution is due to effluent discharge from the chemical industries situated on the bank of river Rava. Total 10 chemical industries are situated on the bank of river Rava in district Y. As per the survey made by NGO 'ECO', these industries have been discharging untreated polluted water in river Rava. 10, less industries are working without the consent of the pollution control board since 2014.
- Research topic and title on the basis of the above problem.

PROBLEM EXERCISE

- River Reva is situated in the state ABC. Four 20 villages of J district X, Y, Z, are totally dependent on the river water of Reva for getting drinking water and irrigation. Since 2018 the people of these 30 villages have been facing the problem of polluted river water. The river water is not fit for the consumption for humans, for animals or for irrigation purpose. As per the report of the local research team of the Research Institute ERJ of district X, the river pollution is due to effluent discharge from the chemical industries situated on the bank of river Reva. Total 10 chemical industries are situated on the bank of river Reva in district Y. As per the survey made by NGO ECO, these industries have been discharging untreated polluted water in river. 10, five industries are working without the consent of the pollution control board since its formation in 2014.

Identify the research topic and title on the basis of the above problem.
